HSCE Code	Expectation Record Mathe	District Curriculum	Instructional Materials	Additional Activities/Resources
L1	Reasoning About Numbers, Systems, and Quantitative Situations	0 11 11 01 11 11	1/2400214439	
L1.1	Number Systems and Number Sense			
L1.1.6	Explain the importance of the irrational numbers $\sqrt{2}$ and $\sqrt{3}$ in basic right triangle trigonometry, the importance of π because of its role in circle relationships, and the role of e in applications such as continuously compounded interest.			
L1.2	Representations and Relationships			
L1.2.3	Use vectors to represent quantities that have magnitude and direction, interpret direction and magnitude of a vector numerically, and calculate the sum and difference of two vectors.			
L2.1	Calculation Using Real and Complex Numbers			
L2.1.6	Recognize when exact answers aren't always possible or practical. Use appropriate algorithms to approximate solutions to equations (e.g., to approximate square roots).			
L3.1	Measurement Units, Calculations, and Scales			
L3.1.1	Convert units of measurement within and between systems; explain how arithmetic operations on measurements affect units, and carry units through calculations correctly.			
L4.1	Mathematical Reasoning			
L4.1.1	Distinguish between inductive and deductive reasoning, identifying and providing examples of each.			
L4.1.2	Differentiate between statistical arguments (statements verified empirically using examples or data) and logical arguments based on the rules of logic.			
L4.1.3	Define and explain the roles of axioms (postulates), definitions, theorems, counterexamples, and proofs in the logical structure of mathematics. Identify and give examples of each.			
L4.2	Language and Laws of Logic			
L4.2.1	Know and use the terms of basic logic (e.g., proposition, negation, truth and falsity, implication, if and only if, contrapositive, and converse).			
L4.2.2	Use the connectives "not," "and," "or," and "if, then," in mathematical and everyday settings. Know the truth table of each connective and how to logically negate statements involving these connectives.			
L4.2.3	Use the quantifiers "there exists" and "all" in mathematical and everyday settings and know how to logically negate statements involving them.			

v.8.06

MICHIGAN Education

HSCE	Expectation Expectation	District	Instructional	Additional Activities/Resources
Code	Expectation	Curriculum	Materials	Auditional Activities/Resources
	W7 '4 41 ' 1	Curriculum	Materials	
L4.2.4	Write the converse, inverse, and			
	contrapositive of an "If, then" statement.			
	Use the fact, in mathematical and everyday			
	settings, that the contrapositive is logically			
	equivalent to the original while the inverse			
	and converse are not.			
L4.3	Proof			
L4.3.1	Know the basic structure for the proof of an			
	"If, then" statement (assuming the			
	hypothesis and ending with the conclusion)			
	and that proving the contrapositive is			
	equivalent.			
L4.3.2	Construct proofs by contradiction. Use			
	counterexamples, when appropriate, to			
	disprove a statement.			
L4.3.3	Explain the difference between a necessary			
	and a sufficient condition within the statement			
	of a theorem. Determine the correct			
	conclusions based on interpreting a theorem in			
	which necessary or sufficient conditions in the			
	theorem or hypothesis are satisfied.			
G1	Figures and Their Properties			
G1.1	Lines and Angles; Basic Euclidean			
01.1	and Coordinate Geometry			
G1.1.1	Solve multistep problems and construct proofs			
01.1.1	involving vertical angles, linear pairs of			
	angles, supplementary angles, complementary			
	angles, and right angles.			
G1.1.2	Solve multistep problems and construct proofs			
01.1.2				
	involving corresponding angles, alternate			
	interior angles, alternate exterior angles, and			
C1 1 2	same-side (consecutive) interior angles.			
G1.1.3	Perform and justify constructions, including			
	midpoint of a line segment and bisector of an			
C1 1 4	angle, using straightedge and compass.			
G1.1.4	Given a line and a point, construct a line			
	through the point that is parallel to the original			
	line using straightedge and compass. Given a			
	line and a point, construct a line through the			
	point that is perpendicular to the original line.			
01.1.5	Justify the steps of the constructions.			
G1.1.5	Given a line segment in terms of its endpoints			
	in the coordinate plane, determine its length			
<u> </u>	and midpoint.			
G1.1.6	Recognize Euclidean geometry as an axiom			
	system. Know the key axioms and understand			
	the meaning of and distinguish between			
	undefined terms (e.g., point, line, and plane),			
	axioms, definitions, and theorems.			
G1.2	Triangles and Their Properties			
C1 2 1	Description of the second of t			
G1.2.1	Prove that the angle sum of a triangle is 180°			
	and that an exterior angle of a triangle is the			
	sum of the two remote interior angles.			

v.8.06

Geometry Alignment Record Mathematics HSCE

MICHIGAN Education

		Trivit		V.8.06 Education
HSCE Code	Expectation	District Curriculum	Instructional Materials	Additional Activities/Resources
G1.2.2	Construct and justify arguments and solve multistep problems involving angle measure, side length, perimeter, and area of all types of triangles.			
G1.2.3	Know a proof of the Pythagorean Theorem and use the Pythagorean Theorem and its converse to solve multistep problems.			
G1.2.4	Prove and use the relationships among the side lengths and the angles of 30°- 60°- 90° triangles and 45°- 45°- 90° triangles.			
G1.2.5	Solve multistep problems and construct proofs about the properties of medians, altitudes, and perpendicular bisectors to the sides of a triangle, and the angle bisectors of a triangle. Using a straightedge and compass, construct these lines.			
G1.3	Triangles and Trigonometry			
G1.3.1	Define the sine, cosine, and tangent of acute angles in a right triangle as ratios of sides. Solve problems about angles, side lengths, or areas using trigonometric ratios in right triangles.			
G1.3.2	Know and use the Law of Sines and the Law of Cosines and use them to solve problems. Find the area of a triangle with sides a and b and included angle θ using the formula Area = $(1/2) a b \sin \theta$.			
G1.3.3	Determine the exact values of sine, cosine, and tangent for 0°, 30°, 45°, 60°, and their integer multiples and apply in various contexts.			
G1.4	Quadrilaterals and Their Properties			
G1.4.1	Solve multistep problems and construct proofs involving angle measure, side length, diagonal length, perimeter, and area of squares, rectangles, parallelograms, kites, and trapezoids.			
G1.4.2	Solve multistep problems and construct proofs involving quadrilaterals (e.g., prove that the diagonals of a rhombus are perpendicular) using Euclidean methods or coordinate geometry.			
G1.4.3	Describe and justify hierarchical relationships among quadrilaterals (e.g., every rectangle is a parallelogram).			
G1.4.4	Prove theorems about the interior and exterior angle sums of a quadrilateral.			
G1.5	Other Polygons and Their Properties			
G1.5.1	Know and use subdivision or circumscription methods to find areas of polygons (e.g., regular octagon, nonregular pentagon).

G1.5.2	Know, justify, and use formulas for the			
	perimeter and area of a regular <i>n</i> -gon and			
	formulas to find interior and exterior angles of			
	a regular <i>n</i> -gon and their sums.			
G1.6	Circles and Their Properties			
G1.6.1	Solve multistep problems involving			
G1.0.1	circumference and area of circles.			
G1.6.2	Solve problems and justify arguments about			
	chords (e.g., if a line through the center of a			
	circle is perpendicular to a chord, it bisects the			
	chord) and lines tangent to circles			
	(e.g., a line tangent to a circle is perpendicular			
	to the radius drawn to the point of tangency).			
G1.6.3	Solve problems and justify arguments about			
	central angles, inscribed angles, and triangles			
	in circles.			
G1.6.4	Know and use properties of arcs and sectors			
	and find lengths of arcs and areas of sectors.			
G1.8	Three-dimensional Figures			
G1.8.1	Solve multistep problems involving surface			
	area and volume of pyramids, prisms, cones,			
	cylinders, hemispheres, and spheres.			
G1.8.2	Identify symmetries of pyramids, prisms,			
	cones, cylinders, hemispheres, and spheres.
